

2024 *Online*

Designed for
**FOOD INDUSTRY
PROFESSIONALS,**
this series covers essential
topics for practical insights
and actionable takeaways

FALL OPERATIONS CONFERENCE

September 25 - October 23
Wednesday's 2 pm (Eastern)

September 25
Project Management
Workshop

Engage with industry leaders, design-build experts, OEMs, and food manufacturers to explore best practices in project management. Learn how to streamline project execution, minimize delays, and maximize success

October 2
Transitioning from
Legacy Plant to Smart
Factory

Automation experts will guide you through upgrading from legacy equipment to smart factory technology. Discover how to adopt new technologies, enhance operations, and maintain competitiveness in today's market

October 9
Meeting Increased
Demand with a
Decreased Labor Force

Explore strategies to increase capacity, throughput, and efficiency to tackle labor shortages and skill gaps. Learn how to support your workforce with advanced technical training

October 16
Data-Driven
Maintenance as a
Margin Enhancer

Unlock the potential of data-driven maintenance to optimize your bottom line. Gain insights from sensors, remote monitoring, and IoT experts on predictive maintenance, reducing downtime, and minimizing production costs

October 23
Disaster Prevention and
Contingency Planning
for Operations

Learn to safeguard your operations against unforeseen events. Topics include understanding disaster scenarios, conducting risk assessments, developing contingency plans, integrating technology in prevention and response, ensuring supply chain resilience, and continuous improvement
